- Implementing **reliable cybersecurity solutions** to protect your data and your information system.

Making a success of your societal, energy and ecological transition

Green & Social" solutions: diagnosis, training, consulting, certification or labelling, entrust the development of your action plan to Apave's teams.

Enhancing the performance of your organisation

Do you want to commit to a Quality approach or enhance the one already in place? Does your client require proof of your commitment to the quality of the services you provide? Improve your performance and competitiveness by obtaining certification for your organisation in accordance with ISO 9001, ISO 14000, ISO 50001, ISO 26000, ISO 27000, ISO 55001, EN 9100, EN 9110 or EN 9120 standards.

Safety Audit

Apave Aeroservices offers a service called "safety audits" to evaluate the safety performance of air operators chartered to transport oil and gas company personnel. It aims to assess risks and is a decision support tool in their choice to select or not an airline. A full report on the targeted airline is then issued, presenting the overall assessment and risk areas, supported by a series of simple indicators for easy understanding.

The Apave teams offer comprehensive support to meet all the needs of aircraft operators

Technical support

- Internal and supplier audits,
- Aviation safety audit,
- Organisational consulting,
- Optimisation of the overall process,
- Asset management,
- Development of a maintenance programme,
